Lead – Accenture Advanced Technology Centers Global Network
and Advanced Technology Centers in India | Leads 300K+ people to
deliver enterprise reinvention for clients worldwide

Greater Bengaluru Area

Summary

I lead Accenture's Advanced Technology Centers across Global Network and India. A community of 300,000+ technology professionals delivering on commitments to over 2,000 clients worldwide and helping clients reinvent their technology portfolios and accelerate their transformation journeys. My work sits at the intersection of technology, delivery, and business value — partnering with CxOs to embed AI-by-Design and Agentic automation into how we solution and deliver, so clients see real outcomes from their enterprise programs, faster. Over 28 years, I've designed, architected, and delivered large-scale technology, digital and data-AI transformations for Fortune 500 companies. I've built intelligent automation platforms, led enterprise data strategies as a Master Data Architect, and championed engineering practices like SAFe/Agile and DevOps at scale across Accenture India. Some highlights from my journey include leading Accenture's Value Chain transformation, connecting the digital thread end to end—from opportunity through delivery—with AI. I have also led Product Engineering teams and, as Global Assets Engineering Lead, built flagship intelligent automation platforms. Along the way, I have been recognized as an Accenture Prolific Inventor and had the opportunity to share my perspectives on technology and innovation at forums including ET.CIO, CAST, Splunk, and TechGig. I hold a B.E. in Computer Science (Mumbai University Rank Holder) and am currently pursuing a Master's in AI & Machine Learning with a Generative AI specialization at International Institute of Information Technology (IIIT-B) and Liverpool John Moores University. I hold certifications including Accenture Enterprise Solution Architect, Master Data Architect, Master Automation Architect, Senior Technology Architect, Elite Client Quality Director, AWS Certified Professional, and Certified ML Professional, Certified Generative AI with Large Language Models professional. If you're working on large-scale technology reinvention, I'd be glad to connect.

Experience

Accenture

24 years

Lead - Advanced Technology Centers Global Network & India | Senior Managing Director

September 2025 - Present (1 year)

Bengaluru

Leading Accenture's Advanced Technology Centers across Global Network and India — 300,000+ professionals, 2,000+ clients. Responsible for Transformation and Client Delivery, bringing Generative AI, platform engineering, and intelligent automation to reinvent how clients run their technology programs. Also leading Accenture's internal Value Chain transformation — connecting sales, solutioning, and delivery with Agentic AI.

Global Technology Delivery Lead | Senior Managing Director | Accenture Technology

September 2023 - September 2025 (2 years 1 month)

India

A delivery executive who has governed technology delivery at every scale — from 200-person client units to 310K+ professionals working across 8,000 global contracts. A certified Elite Quality Assurance Director and repeat recovery specialist who turns troubled engagements from loss to profit.

Global Technology Solutions Lead | Senior Managing Director | Accenture Technology

July 2021 - August 2023 (2 years 2 months)

Bengaluru

A trusted CxO advisor for technology transformations and a deal solution architect who led a 2,000-strong global solutions practice to its best-ever commercial performance, and conceived Value-led Managed Services offering.

Lead: Assets Strategy & engineering

June 2018 - July 2021 (3 years 2 months)

Bengaluru

A prolific inventor and product innovator who built and scaled Accenture's intelligent automation and data-platform portfolio; defines platform strategy, go-to-market and pricing. Backed by 70+ personal patents.

Managing Director

September 2002 - May 2018 (15 years 9 months)

Greater Bengaluru Area

Leading ATC India Financial Services North-America portfolio. Personally led large-scale Application Outsourcing and Systems Integration engagements delivery.

SAS

Associate Consultant

May 2000 - August 2002 (2 years 4 months)

A certified Master Data Architect with hands-on expertise across ETL and Data architecture, enterprise DW design, BI platforms and data engineering for AI/ML. Scaled environments from 500GB to 500TB across Financial Services, Insurance and Telecom.

National Stock Exchange of India Limited

Analyst

August 1998 - April 2000 (1 year 9 months)

Data Warehouse & Business Intelligence Implementation
